Bringing Data into View

Empower Oracle E-Business Suite Users to Answer Their Own Business Questions

Company Overview

Noetix automatically generates metadata from Oracle E-Business Suite, Oracle's Siebel Customer Relationship Management, and Oracle's PeopleSoft Enterprise applications, enabling immediate access to data. More than 1,400 customers worldwide use Noetix to quickly generate the ad hoc operational reports needed for critical business decisions.

Integration Overview

NoetixViews for Oracle E-Business Suite enables fast, easy, and secure custom report development. The ability to develop custom reports is an absolute necessity for achieving true success with Oracle, but it is technically challenging. NoetixViews transforms the complexity of the Oracle Database into recognizable business views that can be used by technical and nontechnical users alike to create custom reports and ad hoc queries.

Integration Details

NoetixViews uses Noetix MetaBuilder technology to generate database views that are automatically tailored to each customer's specific Oracle E-Business Suite configuration. The supported configurations include

- Multiorg configurations, including business groups, sets of books / ledgers, operating units, and inventory organizations
- More than 20 distinct key flexfield structures, including accounting, item category, system items, payroll cost allocation, and territory key
- Descriptive and context-sensitive descriptive flexfields
- Human resources, special, and extra information types
- Lookup tables
- Flexfield language translations

Simplify Report Creation for End Users

During the installation process, NoetixViews builds a help file that is tailored to the customer's Oracle E-Business Suite configuration. The help file guides users and IT professionals through query and report development. It has fully searchable descriptions of views and columns, it lists the site-specific values from lookup

INTEGRATED WITH
The Oracle logo, consisting of the word "ORACLE" in white, bold, sans-serif font inside a red rectangular box. Below the box, the words "E-BUSINESS SUITE" are written in a smaller, bold, sans-serif font.
E-BUSINESS SUITE

Through the Oracle PartnerNetwork Application Integration Architecture for Partners Initiative, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

Availability

In the U.S. and Canada, please call +1.866.466.3849.

In Europe, please call +44 0(20) 8610 6023.

Support

Noetix provides a full range of services, including consulting, managed services, education, and customer support.

tables, and it includes hints on how to use the views to answer common business questions. Additional information such as join-to columns and the identification of indexed columns provide IT professionals with valuable insight to expedite report development and optimize query performance. A cost-saving resource, the help file empowers users to rapidly develop their own ad hoc queries and reports without taxing IT resources.

Upgrade Protection

Reports developed directly against the Oracle E-Business Suite database tables can require expensive reworking when the applications are upgraded. Noetix protects reports from these database changes by automatically remapping new or changed tables to the views to reflect these changes. This feature eliminates the need for expensive report maintenance and simplifies the report migration process.

Advanced Integration with BI Tools

NoetixViews works with Noetix Generator to power popular business intelligence (BI) reporting tools, such as Oracle Business Intelligence Suite Enterprise Edition, Oracle Discoverer, and other leading BI tools, to accelerate access to Oracle E-Business Suite application data.

Supports Oracle E-Business Suite Security Model

NoetixViews works with both the Oracle General Ledger and Oracle Human Resources Management System security models to protect highly sensitive data, even in Web-based distributed environments. Roles and security profile installation options provide record-level security capabilities.

Coverage

NoetixViews offers coverage for a variety of Oracle products including Oracle Financials, Oracle Advanced Supply Chain Planning, Oracle Discrete Manufacturing, Oracle Process Manufacturing, and Oracle Projects.

Noetix Environment

NoetixViews 5.8.1 for Oracle E-Business Suite
